### NO HOVE FOR HOAR FROM OLD POINT COMPORT

TEROM A STAFF CORRESPONDENT. HARRISBURG, Jan. 30.-The fire has been so well drawn from the wounded pride of the Legislature by yesterday's artful feint that to-day Cameron once more floats serenely on top. A resolution condemning the senior Senator from Pennsylvania in the harshest terms, and distinctly mentioning his resignation as a possibility, was sprung in the House by a member from Butler

But it was promptly squelched. It was not even received by the body. It looked as though the sore had healed very fast and there was no disposition to remove the piece of court plaster which Senator Williamson and Dick Quay stuck on Thursday.

A Veto From Pattison Probable. Nothing has yet been heard, by the way, of Governor Pattison's ideas of the concurrent resolution which was passed Thursday calling on Cameron to vote for the Federal elections bill. He has nine days yet before he need return the paper. There is little doubt but that he will take advantage thus afforded him of inditing a letter of political doctrines to the Legislature, and there is no question whatever that the Demseratic contingent, in both Houses will stand together and vote to sustain his veto. On many measures which the Governor may veto, the Republicans may count on securing three or four interested votes from the Democratic side to pass such measures over the veto, but this is purely a party

raised the point to-day that a concurrent resolution becomes effective as soon as passed by the two branches of the General Assembly, and need not necessarily wait for the executive approval.

The Governor Has the Advantage. The weight of evidence, however, is on the other side. Parliamentary usage has established the practice. They are always sent to the Governor, and his action has generally been awaited with courtesy. After formally sending him this resolution it would be grossly impolite to send a transcript to Washington without waiting the return of the original from the Executive Depart-

The resolution introduced in the House this morning by J. M. Thompson, of Butler, is one that he has had in his desk for three days. It reads as follows:

WHEREAS, Our senior United States Sens tor, J. Donald Cameron, of Pennsylvania, has by his acts pertaining to the silver question and the elections bill, cone in direct opposition to the principles of the party which has recently and for the third time elected him to his high position, said acts being unrepublican, unwarranted and a betrayal of the principles and pledges vouched for by the gentlemen of the Senate who presented his name to the Penn sylvania Legislature for re-election to the office of United States Senator and reflecting re-Resolved (if the Senate concur), That we, the members of the House of Representatives of Pennsylvania, condemn his course, and request his closer adherence to party principles and issues or his resignation.

# Not Even Allowed a Hearing.

The resolution was greeted with a storm of noes, and a general cry went up that it should not be read a second time, which is the rule. Mr. Lytle, of Huntingdon, in a voice full of indignation, moved to lay the resolution on the table, while Mr. Fow raised the point that it was not in order, as the House could not instruct a member of the Senate.

Speaker Thompson put the question "Will the House agree to a second reading?" and a few syes were heard, and then an overwhelming volume of noes, from the depths of which Thompson's voice was heard loudly demanding the year and nays. That settled the matter, and the House resumed its usual calm, read a few bills the first time and adjourned until Monday STOFIEL.

### WILL NOT CHANGE HIS MIND.

#### The Action of the Legislature Will Have No Effect on Cameron.

SPECIAL TELEGRAM TO THE DISPATCH.] WASHINGTON, Jan. 30 .- Before his departure from Fortress Monroe Mr. Cameron told a prominent Republican Senator, who asked him if he would vote to take up the elections bill at a later period in the session, that he was not prepared to say whether he would or not. This was practically a refusal to do so. Mr. Cameron told this same Senator that he had no doubt that a majority of the Republicans in Pennsylvania were in favor of the elections bill, but that made no difference to him. He said that he was right, and that he "did not care what other people might say about it." whole thing," he added, "would blow over in a short time." ### DOCKERY EXPLAINS.

#### HE HAD NO REAL UNDERSTANDING WITH SENATOR CAMERON.

On His Own Responsibility He Delayed Testimony Until After the Election in Order to Help Down the Force Bill-No Evidence of Any Impropriety.

WASHINGTON, Jan. 30. - Representative Dockery, of Missouri, appeared before the Silver Pool Investigating Committee, and said that inasmuch as he had, when last on the stand, given his testimony hastily and without sufficient deliberation, he desired briefly to re-state the reasons why he did not wish to testify until the day after the Senatorial election in Pennsylvania. He read a written statement, which was substantially

as follows: The force bill was at that time pending in the Senate. I was desirous that it should be beaten. The attitude of nearly every Senator in respect to that measure was very generally understood, except that of Senator Cameron. The election of his successor was to take place on Tuesday, and the committee was to have met the previous Saturday. It was known that if Cameron was re-elected he would vote for the force bill, but his attitude of uncertainty led me to indulge the hope that he would vote against it.

Under these circumstances there was nothing to induce me to desire that another wish to be the cause of making public, at that juncture, any private business transaction of the Senator of which I had information, that night be entirely legitimate and proper and

might be entirely legitimate and proper and which could, before an opportunity was afforded him of showing its entire propriety, be used by his political enemies to his detriment. I had information that Cameron had made a purchase of silver at some time during the last session of Congress. I had no knowledge that he was connected with any pool, nor had I any information that would warrant me in a conclusion as to the propriety or impropriety of the purchase made by him.

I merely had information as to the simple fact that he had purchased silver. I believed it to be but justice to the Senator that such fact should not be made public by me when it might be used by his political opponents to his immediate injury without time or opportunity for him to resent the same by explaining the facts and showing the propriety of the transaction, if it was, in fact, proper.

There was no agreement or understanding between Senator Cameron and myself or any other person that my testimony should be delayed in consideration of, or as an inducement for, the Senator to vote against the force bill. I was not requested by any person to delay my testimony, nor was any suggestion to that effect made to me by any person. I acted upon my own judgment, induced thereto solely by the facts and reasons I have stated.

Merely Desired a Postponement.

Merely Desired a Postponement. In response to Chairman Dingley, Mr. Dockery said that he had no knowledge of any intention on the part of the committee to adjourn over from Saturday to Wednesto adjourn over from Saturday to Wednesday, except that he had heard Mr. Oates say
to one of the members that he wanted to go
over to New York. He (Mr. Dockery)
therefore thought it likely the committee
would adjourn over until Wednesday when
Mr. Oates would be back. Witness had
never suggested such an adjournment to any
member of the committee. He admitted he
had taken the chance that Senator Camerror's allows purchase might have had comeron's silver purchase might have had something improper or corrupt in it. He did not intend to screen Mr. Cameron or suppress anything, but to delay his testimony

until after the election. The committee questioned Mr. Dockery very closely as to whether or not the questhe desirability of an adjournment over until Wednesday had been a matter of conversation between Mr. Dockery and Mr. Vest or any other person, but Mr. Dockery stated that, while he had no recollection one way or the other about the matter, that it was possible he might have incidentally had

### GRADED SALARY BILL

#### An Ohio Legislative Committee Agrees of One for County Officers.

ISPECIAL TELEGRAM TO THE DISPATOR. COLUMBUS, O., Jan. 30 .- The salary bill for county officers has been agreed upon. It is based on the population of each county and graded. The salaries under the law will range from \$900 to \$4,500 and fees with certain of the offices. The law is to be general. A bill was presented in the Legislature providing a new charter and more efficient government for Cleveland.

The Governor proposes, in a measure that has been introduced, to make a person eligible to the office of probate judge only after an examination by the Supreme Court touching his fitness and qualification for the office. The bill also provides that a pro-bate judge must not be associated in a partnership with any attorney practicing in the court.

Among bills introduced one amends the law passed last winter creating free public employment bureaus. It puts the superintendents of such bureaus under the control of the Commissioner of Labor Statistics and fixes the salary at \$100 per month. The other measure amends the present law by giving Commissioner of Labor Statistics power and authority to gather informa-

#### GROVER AND DAVID MAY MEET t a Private Dinner Given in a New York Club To-Night

SPECIAL TELEGRAM TO THE DISPATCH. NEW YORK, Jan. 30 .- Governor David B. Hill and Grover Cleveland may possibly meet to-morrow night at a dinner to be given by Senator Wm. L. Brown in the library of the Manhattan Club. The dinner is to be private. Colonel Brown resolved some months ago to give a dinner to the governors of the club. He notified the

tention and requested them to assume the management of the dinner. Herman Oelrichs, Dock Commissioner Cram and the other three members of the committee set to work in earnest, and the result of their labors, it is said, will be a very good dinner indeed. The diners will ait about an eval table that will comfortably accommodate 32, which is the number expected.

Colonel Brown will sit at the head of the

#### JUST FOUND IT OUT.

#### Plantation Hand Who Did Not Know Tha Slavery Had Been Abolished.

ISPECIAL THERGRAM TO THE DISPATCE. TOPEKA, Jan. 30 .- The Capitol has a special from Valley Falls, in this State, giving facts in the history of Thomas Hunter, a colored man who has just arrived there from Sabine parish, La., and who until less than six months ago did not know that slavery had been abolished. He was owned and worked by Manuel Lafitte, a French creole, who runs a large plantation and owns 500 negroes. He does not allow and owns our negroes. He does not allow the colored people to speak to a stranger un-der the penalty of death. Even when they went to the railroad to haul cotton, the mas-ter and overseers guarded them with loaded shotguns and threatened to shoot them if they spoke to a white man. Hunter has two broken ribs and the scars of the lash in-terlace his hash. terlace his back. At one time not long ago he was tied up to a post and given 200 lashes for a very trivial offense. He says that men and women are frequently whipped. They never sell any of them, but in every ther way it is as much slavery as ever existed. He says no white men ever come through there. He was near the Sabine river, in Sabine Parish, La., a region of country that is very swampy and only very sparsely settled, one plantation occupying all the tillable land for many miles in every direction and surrounded by cypress swamps so that it is easy to keep negroes isolated from the rest of the world. Hunter escaped three months ago to the river, hid on a boat, through the help of a colored man, and learned from him for

ISPECIAL TELEGRAM TO THE DISPATCIL 1 NEW HAVEN, Jan. 80 .- Love burned with a constant flame in the bosom of Mrs Louisa English, 71 years old, and wealthy, of Bridgeport, but relatives interfered with her passion, and a day or two ago had a conservator appointed, who must see to it that she does not wed her lover. The man she adores is Isaac Jewell, who is young and rather good looking. She meant to marry him, and lavished money and gifts on him for several months, but suddenly ill-ness disabled her, and then her relatives took the field against her suit.

The O'Shea House Also the Mecca of Many Curiosity Hunters.

# CYNIC'S HISTORICAL SUGGESTION

IBY DUNLAP'S CABLE COMPANY. LONDON, Jan. 30 .- A curious fact has just happened with regard to the Parnell ease. Crowds have recently been observed in Medina Place, and every day more and more people have been seen wending their way thither. The object of attraction is the fire-escape by means of which Parnell's escape was effected on the memorable occasion when Captain O'Shea returned at an inop-

portune and unexpected hour,
It is merely an iron ladder fastened to the window, but crowds go all the same to stare at it as if it were a celebrated object of art. Many an Arri and his Ariel make a pilgrimage to the spot, and their comments on the situation are amusing.

The commercial aspect of this attractive object, too, has not been lost sight of, and the owners of the house have been offered a large sum for the ladder by a museum proprietor, who expects to reap a golden harvest if he is able to succeed in purchasing it. Another offer has been made for the house itself, which would then be opened to the public gaze at so much a head, as it is believed, with the liberal advertising the affair has had, crowds would flock to see how and where Parnell escaped, as well as the rooms so closely connected with this. the rooms so closely connected with this romantic episode in his life.

So great is the interest bestowed now on this house that a cynical gentleman was heard to remark as he surveyed the scene: "I shouldn't be surprised if the society for making historical spots were to be petitioned to have a tablet placed on this house with the inscription: 'Charles Suewart Parnell made his escape here on—' the date to be ascertained and filled in."

### NEW LANGUAGE CODE

Sealing Wax in Many Colors Used as the Medium for It.

IBT DUNLAP'S CABLE COMPANY. LONDON, Jan. 30 .- Many visitors to Paris have lately been remarking on the rows of sealing wax of all bues and shades, many being novel colors, which are exposed in the windows of the fashionable stationers'shops. It now appears that a meaning is attached to each of these colors, which is as eloquent in its silence as the language of flowers.

In this new language, white means a proposal of marriage; black, death, and violet, condolence. Chocolate is used for invitations to dinner; vermillion for business communications, while ruby, suggestive of coral lips and bleeding hearts, is used to seal the missives little Don Cupid inspires.

Green is twiceal of hope for obvious reasons: Green is typical of hope for obvious reasons brown, of melancholy; blue, of constancy, and yellow, of jealousy. Pale green is the color selected for notes containing a reproof; pink is affected by young ladies when writing to each other, and gray is used for letters to friends who have passed the age when pink would be appropriate.

### LOSING HER TITLE.

A Peculiar Effect of the Duchess of Man

IBT DUNLAP'S CABLE COMPANT.I LONDON, Jan. 30 .- The marriage of Her Grace, the Duchess of Manchester, is causing some gossip, and people are discussing the price she will pay for the step, as under the will of her late husband she will forfeit her income. But a curious point, worth the mentioning, is also involved in this marriage with the Marquis of Hartington. It is that her title of Dowager Duchess Manchester will not descend with her.

The usual custom which will be followed is that she will still be known as the Duches of Manchester until the death of the Duke of Devonshire, who is now a man of over 72, shall give the Marquis of Hartington, who has already celebrated the fifty-seventh anniversary of his birth, that title and seat the Upper House, when she will become the Duchess of Devoushire and will thus attain the matrimonial distinction of having been the wife of two dukes in succes

### A COSTLY STRIKE

Scotch Railway Troubles Cause Heavy Loss to Both Sides.

IBY DUNLAP'S CABLE COMPANY. LONDON, Jan. 30 .- The strike on the Scotch railway lines, which for all practical purposes may be regarded as having come to an end on Thursday night, lasted for exactly five weeks and four days. Its proportions may be best recognized when the fact, which does not strike one in reading the daily reports, is made clear that at one time 9,000 men belonging to the North British, the Caledonian and the Glasgow and Southwestern railways were out.

The greatest railway strike which was ever known in England cost the companies £127,000, while the losses of the traders and the men employed could not be reckoned at less than £500,000. It is a curious fact in the history of English railway strikes that the men have been invariably beaten, have had to accept a compromise with the

To Miners, Is the Investigation to Be Commenced To-Day

Why Naked Lamps Were Used Where

[FROM A STAFF CORRESPONDENT.] MAMMOTH, PA., Jan. 30. -The investigation by the Legislative Committee, to be commenced to-morrow morning, into the cause of Tuesday's accident, will, if thoroughly performed, elicit some information concerning mining practice in the coke regions which may prove of a sensational character. The matter has been taken to heart by every miner in the region, and

ie view of ascertaining where the blame for the occurrence should be properly placed. It is regarded as doubly unfortunate that Snaith, the fire boss of the shaft mine, should have been lost. He was responsible for the safety of the mine and had full latitude to adopt such measures as he deemed proper for the safety of the workers. On Tuesday morning he had reported the mine as safe and had so informed the men. In support of his opinion he was present with. and perished with them when the summons came. Had he survived there is just a probability that the real condition of the workings at the fatal moment might be as-certained, and in his absence any blame that may be thrust upon him should be ac-

cepted as against a man who cannot now plead in his own defense. Snaith's Opinion of the Mine.

"Yes."

The work of clearing out the mine was proceeded with all day. Volunteers for the work were scarce, due partly to the smell from the decomposing animals and partly to a fear of further disaster. There are still four men missing, but it is uncertain whether they are among the unidentified dead buried at Scottdale or still in the mine. Their names are:
